

FASD DIAGNOSTIC TRAINING AND CONSULTATION

Designed for clinicians, this training provides the skills and knowledge needed to identify fetal alcohol spectrum disorders (FASD) and apply diagnoses in clinical settings.

Training Takeaways:

- Practical training on FASD diagnostic criteria
- Implementing diagnostic tools and assessment batteries
- Evidence-based interventions and treatment recommendations
- Connection with a community of FASD-diagnostic clinicians
- Clinic-level implementation for sustainability
- Ongoing technical assistance and case consultation

Designed for:

- Advanced practice medical providers and physicians caring for pediatric patients
- Testing psychologists specializing in pediatric neurodevelopmental or neuropsychological assessment

Training Includes:

- Customized sessions for clinic needs
- Virtual, in-person, or hybrid delivery
- Case consultation with experienced providers
- Technical assistance for practical implementation
